DETAILED ACTION

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-2, 4, 6-9, 11-14, 16-19, 21, 23-26, 28-30, 32-35, 37, 39-42, 44-46 and 48-49 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 5 542 420, Goldman et al. Aug. 6 1996; 'Personalized method and system for Storage, communication, analysis and processing of health related data.
2. As to claims 1, 8, 18, 25, 34 and 41 Goldman teaches a method, system and medium of:
 - a. Accepting patient information via a client device(C.23 I.65-67)
 - b. Categorizing the person based on entered information(C.4 item (d)).
 - c. Service providers viewing entered information(C.4 I. 58-60).
 - d. Secure area where information is accessible by client device(C.3 I. 40-44)
3. As to claims 2,9,19,26,35 and 42 Goldman teaches allowing access to a secure area.(C. 18 I. 22-24 and Fig. 6 Ref 108)
4. As to claims 4, 11, 21, 28, 37 and 44 Goldman teaches information entered in a predetermined format.(Fig 7 and 78a).
5. As to claims 6, 23 and 39 Goldman teaches the professional service provider as a health care provider(C.4 I. 58-60).

Claim Rejections - 35 USC § 103

11. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

12. Claims 3, 10, 20, 27, 36 and 43 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 5 542 420, Goldman et al. Aug. 6 1996;as applied to Claims1-2, 4, 6-9, 11-14, 16-19, 21, 23-26, 28-30, 32-35, 37, 39-42, 44-46 and 48-49 above, and further in view of US Patent 6 589 169 B1 Surwit et al. Filed Dec. 23, 1999; 'Systems, methods and computer program products for monitoring, diagnosing and treating medical conditions of remotely located patients undergoing anticoagulation therapy.
13. As to claims 3, 10, 20, 27, 36 and 43 Goldman teaches providing medical diagnosis and treatment over a network. However, Goldman fails to teach notifying a

person that the service provider had provided information. Surwit teaches communication with the patient when a service has been provided(C.3 I. 15-18). It would have been obvious to one skilled in the art at the time of invention to combine the teaches of Surwit with Goldman so as to allow the patient to be aware of the provided information regardless of when and where they are and not have to wait at network device for a response.

14. Claims 5, 15, 22, 31, 38 and 47 are rejected under 35 U.S.C. 103(a) as being unpatentable over over US Patent 5 542 420, Goldman et al. Aug. 6 1996; as applied to Claims 1-2, 4, 6-9, 11-14, 16-19, 21, 23-26, 28-30, 32-35, 37, 39-42, 44-46 and 48-49 above, in further view of "The email doctor who only makes mouse calls"; Evening Standard, April 3, 2000. article discussing e-med.co.uk.

15. As to claims 5, 15, 22, 31, 38 and 47 Goldman teaches medical diagnosis and analysis on a network. E-med teaches the user logging into the network to allow secure private access. It would have been obvious to one skilled in the art at the time of invention to combine the teaches of e-med with Goldman so as to continue to be compliant with HIPPA and allow confidentiality of the persons health records.

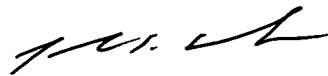

16. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Foreign patent JP 10033486 A discloses a system of medical diagnosis by a medical doctor to a patient at home or remotely located.
